DETAILED ACTION

Election/Restrictions

1. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. *Claims 1-6, 25-28 and 35-40* are drawn to "computer network managing: computer network access regulating", classified in *class 709, subclass 225*.
- II. *Claims 7-15, 29-31 and 41-45* are drawn to "computer-to-computer session/connection establishing: network resources access controlling", classified in *class 709, subclass 229*.
- III. *Claims 16-24, 32-34 and 46-50* are drawn to "remote data accessing: accessing a remote server", classified in *class 709, subclass 219*.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions of Group I is related as combination and subcombinations of Groups II-III. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombinations as claimed for patentability, and (2) that the subcombinations has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination (Group I) as claimed does not require the particulars of the subcombinations (Groups II-III) as claimed because to both subcombinations and combination are presented and assumed to be patentable. The omission of specific details of the subcombinations as recited in

Art Unit: 2143

claims 7-24, 29-34 and 41-50, in the combination as recited in claims 1-6, 25-28 and 35-40 is evidence that the patentability of the combination does not rely on the details of the specific subcombinations. The subcombinations of Groups II-III have separate utility such as "computer-to-computer session/connection establishing: network resources access controlling" and "remote data accessing: accessing a remote server".

4. Inventions of the Groups II-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions of Groups II-III have separate utility such as "computer-to-computer session/connection establishing: network resources access controlling" and "remote data accessing: accessing a remote server". See MPEP § 806.05(d).
5. Because these inventions are distinct for the reasons given above and the search required a separate status in the art as shown by their different classification, the search required for one Group is not required for other Groups, restriction for examination purposes as indicated is proper.
6. Applicant is advised that the reply to this requirement to be complete must include and election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 2143

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS ACTION IS SET TO EXPIRE THIRTY DAYS FROM THE MAILING DATE OF THIS COMMUNICATION. FAILURE TO RESPOND WITHIN THE PERIOD FOR RESPONSE WILL CAUSE THE APPLICATION TO BECOME ABANDONED (35 U.S.C. § 133). EXTENSIONS OF TIME MAY BE OBTAINED UNDER PROVISIONS OF 37 CFR 1.136 (A).
